

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

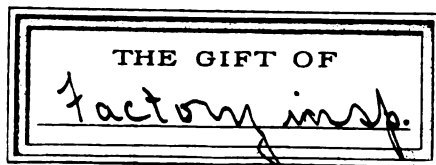

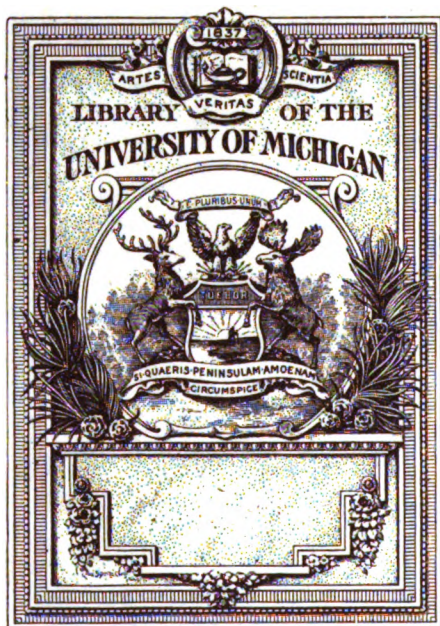

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THIRTEENTH

ANNUAL REPORT

OF THE

FACTORY INSPECTORS

OF

ILLINOIS

Year Ending December 15, 1905

SPRINGFIELD:
ILLINOIS STATE JOURNAL CO., STATE PRINTERS
1906

LETTER OF TRANSMITTAL.

OFFICE OF INSPECTOR OF FACTORIES AND WORKSHOPS,
SECURITY BUILDING,

CHICAGO, ILL., Dec. 15, 1905.

To His Excellency, HON. CHARLES S. DENEEN, Governor of Illinois.

DEAR SIR—I have the honor to submit herewith the thirteenth annual report of the Inspectors of Factories and Workshops for the year ending Dec. 15, 1905.

Very respectfully yours,

EDGAR T. DAVIES,
Chief Inspector of Factories and Workshops

To His Excellency, CHARLES S. DENEEN, Governor State of Illinois:

GOVERNOR—In compliance with section 9 of the statutes creating the Factory and Workshop Inspector's Department of this State, I have the honor to lay before you on behalf of this department the thirteenth annual report of the work performed by the inspectors, and herewith make such recommendations for additional legislation as my experience in enforcing the law has shown to be urgently required. As the Legislature of this State does not convene until the year 1907, and because of the fact that the 1904 report includes drafts of bills which were submitted to the 44th General Assembly, I shall not include in this volume any particular drafts of bills, believing it to be most desirable that a further study of existing conditions will better enable us to draw up bills in legislative form for presentation in the next annual report, which will be due a month previous to the convening of the next Legislature (the 45th General Assembly.)

The past year has been remarkable for the amount of work accomplished and the great increase in the number of inspections made by the department, our work having covered a greater field, and our duties having been much added to through the passage of the new Child Labor Law; most gratifying results have been accomplished through its enforcement.

During the past year we have made 70,559 inspections as compared to 45,690 for the year 1904; this is an increase of 24,869. There were 5,561 places visited and inspected more than once, and when this number is deducted from the total number of inspections made it will be shown that the eighteen (18) inspectors connected with the department visited and thoroughly inspected during the year 64,978 different establishments. This covers a field of 264 cities outside of the city of Chicago, and represents a visit made by the inspectors to every office, laundry, mercantile establishment, theatre, concert hall or place of amusement, factory and workshop. Chicago and Cook county naturally furnish the greatest problems and require the best efforts of a majority of the inspectors. The present force of eighteen (18) inspectors is entirely inadequate to properly inspect all the establishments in the State, and the present appropriation has been entirely inadequate to meet the financial burden of making a proper canvas and inspection of the State.

In Chicago and Cook county 47,196 establishments were inspected for child labor, and 229 places of business, where the metal polishing industry is carried on, were inspected for the purpose of seeing that the law requiring blower pipes and exhaust fans on the polishing wheels was being complied with; there were 17,782 places visited by the inspectors in the State outside of Cook county. In the 70,559 places visited the inspectors report having found 767,473 people employed; of this number 540,018 are in Cook county and 227,455 in the

State outside of Cook county. All told there were found employed 11,755 children under the age of sixteen; of this number 7,152 were boys and 4,603 were girls. This shows a decrease of 656 children employed, as compared to last year (1904), and indicates a steady decrease in the employment of child labor in this State. It is very gratifying when the statistics for the previous years are perused, the percentage of child labor in Illinois for the year 1902 (the year preceding the enactment of the new Child Labor Law) being 3.7 of the total number of people employed, while for the year 1905 this percentage has been reduced to 1.5, which indicates that Illinois stands at the top of the column because of the fact that we employ less child labor than any other industrial State in the Union.

During the year we have carried on many crusades, the inspectors having been required to be detailed to the work of night inspection as well as their regular day work. The results of their efforts were the finding of many violations of the law, but not all violations were prosecuted; the policy of giving the defendant an opportunity to be heard before he is prosecuted, has been carried out and leniency extended in the way of suspending prosecution in all cases where the defendant reported to the office reasonably extenuating circumstances, if the violation reported was the first one located in his establishment. Owing to the fact that many of the violations were intentional or occurred through deliberate carelessness, or the establishment did not have a clean record in regard to child labor, the department prosecuted and secured the conviction of 531 defendants, some of whom were prosecuted on different counts or several charges, making a total of 1,001 charges for which conviction was secured. Some were for failure to protect metal polishing wheels, others under the sweat-shop law for violation of the law employing persons other than members of the immediate family in living rooms where clothing is manufactured; the remainder were for violation of the child labor law and were divided as follows: Three at dangerous occupations; thirty-five for employing children under 14 years of age; 485 for employing children between 14 and 16 without first obtaining a permit from the school authorities so to do; 450 for employing children under 16 more than eight hours in any one day; twenty-one for employing children at night.

Our experience in enforcing the laws charged to this department for enforcement, and the visits of the inspectors to the various establishments and the investigation of existing conditions, prompts me to urgently recommend the adoption of a new law to regulate the manufacture of clothing, wearing apparel, etc. We can never hope to properly cope with the sweat shop evil under the existing statutes, although I believe the most urgent need is the passage of a law which will provide for the health, safety and protection of the employes engaged in the mills and factories of this State, where hazardous machinery is but rarely guarded and too frequently unsanitary conditions prevail. We have made rapid strides in industry and have frequently enacted laws for the protection of capital, but we have been all too unmindful of keeping apace with these changed conditions which require additional legislation to protect the working classes, so that the

laws for their welfare be enacted, the same being necessary if we are to keep apace with the wonderful advance made in mechanical construction and the installation of improved time-saving machinery.

Adequate protection from fire is also a subject which should address itself to the consideration of the Legislature. Illinois does not require the reporting of accidents; therefore no official has been able to garner these most valuable statistics on the subject; the securing of the statistics relative to serious accidents or deaths resulting from such accidents, are statistics which properly belong to the State, and if secured will enable the law-making body to legislate on the important subject of protection of employes in industry, upon matters of fact, thus avoiding legislation upon mere theory.

The re-organization of this department is sincerely desired; an increase in the number of inspectors and an adequate appropriation should be made, so that the department may be placed upon a footing whereby its efforts will not be merely nominal, but will be a source of great benefit to the commonwealth. If it shall be my obligation to compile the next annual report of this department, I shall include in its compilation the above recommendations and such other recommendations as experience should direct to be advisable, and I shall reduce the same to proper legislative form through the drafting of proper bills and shall present the same to the consideration of the 45th General Assembly, with a recommendation for their passage.

Statistical reports of the work performed during the past year will be found in the pages following.

Very respectfully yours,

EDGAR T. DAVIES,
Chief Inspector of Factories and Workshops.

Statistical Tables for the Year 1905.

Statistical Tables for the Year 1905.

STATISTICAL TABLES.

The following table will show the result of inspections for the year 1905.

| | |
|--|----------------|
| Total number of inspections in the State of Illinois..... | 70,539 |
| Number of places inspected for child labor..... | 64,978 |
| Number of places inspected for child labor in Chicago and Cook County..... | 47,198 |
| Number of places inspected for child labor outside of Chicago and Cook County..... | 17,782 |
| Number of places inspected for metal polishing wheels..... | 229 |
| Number of Cities and Towns visited outside of Chicago and Cook County..... | 284 |
| Number of second inspections..... | 5,332 |
| Employés in Chicago and Cook County— | |
| Number of males over 16 years of age..... | 399,346 |
| Number of females over 16 years of age..... | 131,230 |
| Number of males under 16 years of age..... | 5,847 |
| Number of females under 16 years of age..... | 4,095 |
| Total number of employés in Chicago and Cook County..... | 540,018 |
| Employés outside of Chicago and Cook County— | |
| Number of males over 16 years of age..... | 191,581 |
| Number of females over 16 years of age..... | 33,561 |
| Number of males under 16 years of age..... | 1,805 |
| Number of females under 16 years of age..... | 508 |
| Total number of employés outside of Chicago and Cook County..... | 227,455 |
| Employés in the State of Illinois— | |
| Number of males over 16 years of age..... | 590,927 |
| Number of female over 16 years of age..... | 164,791 |
| Number of males under 16 years of age..... | 7,152 |
| Number of females under 16 years of age..... | 4,603 |
| Total number of employés in the State of Illinois..... | 767,473 |

The following tables show the increase in labor as compared with the number of inspections from 1893 to 1905.

| | Places in- spected..... | Men em- ployed..... | Women em- ployed..... | Children em- ployed..... | Total em- ployed..... | Per cent of children.... |
